

Resetting your MyRipon NetID Password

Beginning February 2014, students can use one username and password to log into MyRipon and computers on the Ripon College network. This is your **MyRipon NetID**.

MyRipon NetID

Username: last name first initial
Password: your current MyRipon password.

Network & MyRipon Username & Passwords are the same.

If you forget or wish to change your MyRipon NetID password, you can reset it with Self-Service Password Reset (SSPR).

SSPR is available 24/7 to reset a forgotten password. Find SSPR on the [MyRipon home page](#).

To use SSPR, you must first register your MyRipon NetID.

*Registration involves entering answers to security questions which are used to verify your identity.
You may also register your mobile phone so that you can use it to reset a forgotten password.*

Note: At this time, SSPR cannot reset your Ripon College Gmail password.
